

Microsoft Office Packages Test with Mac Operating System (OS)

1) Office 2019, Office 2016 and Office 365 are tested with Mac OS. Table 1 shows the summarized testing results.

- Operating System is Mac OS - Version 10.13.4

MS Office Package	Can be used properly. There are no found issues.	Cannot be used properly. There are found issues.
Office 2019 (Word, Excel, PowerPoint)	✓	
Office 2016 (Word, Excel, PowerPoint)	✓	
Office 365 (Word, Excel, PowerPoint)	✓

2) Way of Typing

In Mac OS, when using Word and Excel Applications, words with “kombowa ெ” need to be typed as following. Otherwise, the words cannot type properly.

- *Example:*

Considering words like ප්‍රදේශය, ශේෂය, කොළඹ, ප්‍රවේශය, ක්‍රෝඪ්ශීයාව

- *Way of Typing these words*

First need to type the letter, then need to type the “kombuwa” as shown in below examples.

- ක ---> ெ කො
- ච ---> ெ චේ
- ද ---> ெ දේ
- ක ---> රකාරංඝය ---> ெ ---> ூ (ඇලපිල්ල) ක්‍රෝ

- If you type “kombuwa” first, then the output will be generated incorrectly. In Figure 1, the left and right sides display the incorrect and correct words respectively as mentioned above.
